About Me

Frontend Developer based in Doncaster, UK, with Indefinite Leave to Remain and no sponsorship requirement. Experienced in building production-scale React.js and Next.js applications across transportation, ticketing, ERP, advertising, healthcare, and CMS platforms. Strong in TypeScript, Tailwind CSS, responsive UI, accessibility, REST API integration, live dashboards, and performance-focused frontend development.

Work Authorisation

Right to work in the UK: Indefinite Leave to Remain, no sponsorship required.

Available for UK-based frontend developer roles.

Education

BS	University of Wolverhampton , BSc (Hons) Computer Science UK-validated degree delivered in Kathmandu, Nepal	Kathmandu, Nepal Nov 2022 – May 2025
-----------	---	---

Experience

SlashPlus , Frontend Developer	Lalitpur, Nepal June 2024 – May 2026
---------------------------------------	---

Worked as a Frontend Developer using React.js, Next.js, TypeScript, Tailwind CSS, REST APIs, and live data integrations across transportation, advertising, ticketing, healthcare, and CMS platforms.

- Built and maintained responsive React.js and Next.js dashboards for GPS tracking, alerts, geofencing, reporting, and user management across **1000+ public and private vehicles**.
- Developed data-heavy dashboard interfaces involving live tracking, tables, forms, maps, reporting workflows, and role-based user flows.
- Built frontend features for **Digibuzz** and **Nepal Micro Bus Ticketing**, covering ad scheduling, content management, route browsing, booking confirmation, and digital ticket generation.
- Integrated REST APIs and live data updates across transportation, ticketing, CMS, and operational management platforms.
- Improved frontend maintainability by building reusable components, structured dashboard layouts, and consistent form/table patterns across multiple products.

ShotCoder Tech , Frontend Intern / Junior Frontend Developer	Kathmandu, Nepal Sept 2023 – May 2024
---	--

Worked on frontend development for admin panels and operational web applications using responsive UI components, API integrations, and role-based workflows.

- Developed frontend features for a Metal Recycle App, supporting role-based management and integrations with Xero, WhatsApp, and Google Maps.
- Contributed to Shikshya App's admin panel, a smart school management system for students, employees, attendance, roles, exams, finance, and school operations.
- Built reusable responsive components, protected dashboard routes, form-driven workflows, and API-integrated admin screens.

Projects

GPS Sewa [🔗](#)

Real-time GPS tracking platform for public, private, and corporate vehicles.

- Built React.js and Next.js dashboards supporting **1000+ vehicles**, including tracking, alerts, geofencing, reporting, and user management.
- Developed College Bus Track and LMC Garbage Alert modules for route-based tracking, student management, garbage stations, and nearby vehicle notifications.

Sajha Transportation [🔗](#)

Transportation ERP for staff, vehicle, ticketing, accounting, maintenance, and operational workflows.

- Built frontend workflows for staff, vehicle, ticketing, accounting, reporting, and organisational operations.
- Implemented responsive dashboards for attendance, task allocation, maintenance scheduling, cost monitoring, and operational visibility.

Digibuzz [🔗](#)

In-bus digital advertising and announcement management platform.

- Built admin and client dashboards for advertisements, clients, users, buses, screen devices, and announcement content.
- Implemented bus-wise and route-wise content assignment, ad scheduling, media upload, and location-based announcements.

Nepal Micro Bus Ticketing [🔗](#)

Customer-facing digital bus ticket purchasing platform.

- Developed route browsing, seat availability, fare display, booking confirmation, and digital ticket generation flows.
- Integrated backend APIs to fetch route, schedule, and ticketing data.

Additional Projects ---
